

Green Behind the Scene

BayWest® EcoSoft® paper towel and toilet tissue, OrangeClean® degreaser, Green Solutions® janitorial cleaners

Windsor® carpet vacuum

Janitorial staff play a large role in protecting human health and the environment inside the building through their cleaning activities.

The paper towels and toilet paper used at the Alliance Center are chlorine free and made from 100% post-consumer recycled fiber.

Cleaners for bathrooms, glass, carpet and liquid hand soap are chosen for their outstanding cleaning properties. In addition, where possible, they are biodegradable, non-toxic, non-chlorine, non-phosphate, non-flammable and organic.

The vacuum cleaner has a HEPA micro-filter and operates quietly – at a sound level of less than 70 decibels – meeting the Carpet and Rug Institute Green Label Program requirements. Walk-off mats at doorways are vacuumed every other day.

DidYouKnow?

The Green Seal® Environmental Standard for Cleaning Services offers a comprehensive green cleaning guideline which includes – disinfection, carpet cleaning, recycling, indoor plant care and environmentally preferable products and more.
