

# Shower Power

Europa Elite 2gpm Shower Head, available at Resources Conservation Inc.

This shower is fitted with a special showerhead that delivers a pleasantly aerated, full spray with less than 2 gallons of water per minute (at 60 psi).

A lever on the showerhead can regulate the flow, allowing even more water to be saved while soaping up and shaving.

## ***DidYouKnow?***

A good water-saving showerhead maintains strong water pressure and comfortable temperatures, while saving up to 70% in water and energy bills.
